Go!Control

HOW TO REPLACE BATTERIES

How To Replace Batteries

▶ At times you may need to periodically replace the batteries in your wireless security sensors and Z-Wave devices, such as your door lock.

How To Replace Batteries

1. The easiest way to replace batteries for wireless devices is to put the Go!Control panel in a system test.

How To Replace Batteries

2. Once the panel is in a system test, you can open the individual sensor and replace the batteries.

How To Replace Batteries

3. Z-Wave device batteries can be replaced at any time without being in a system test.

   - For the **Thermostat**, take the bottom cover off and replace the batteries.

   - For the **Door Lock**, open the cover of the interior case and replace the batteries.
